

SET 7 – CUSTOMER DEMOGRAPHICS ANALYSIS

DSA0601 – DATA HANDLING AND VISUALIZATION

Student Name	N. Harshith
Register Number	192325078
Department	Artificial Intelligence and Machine Learning (AIML)
Course	Data Handling and Visualization
Set	7

Dataset

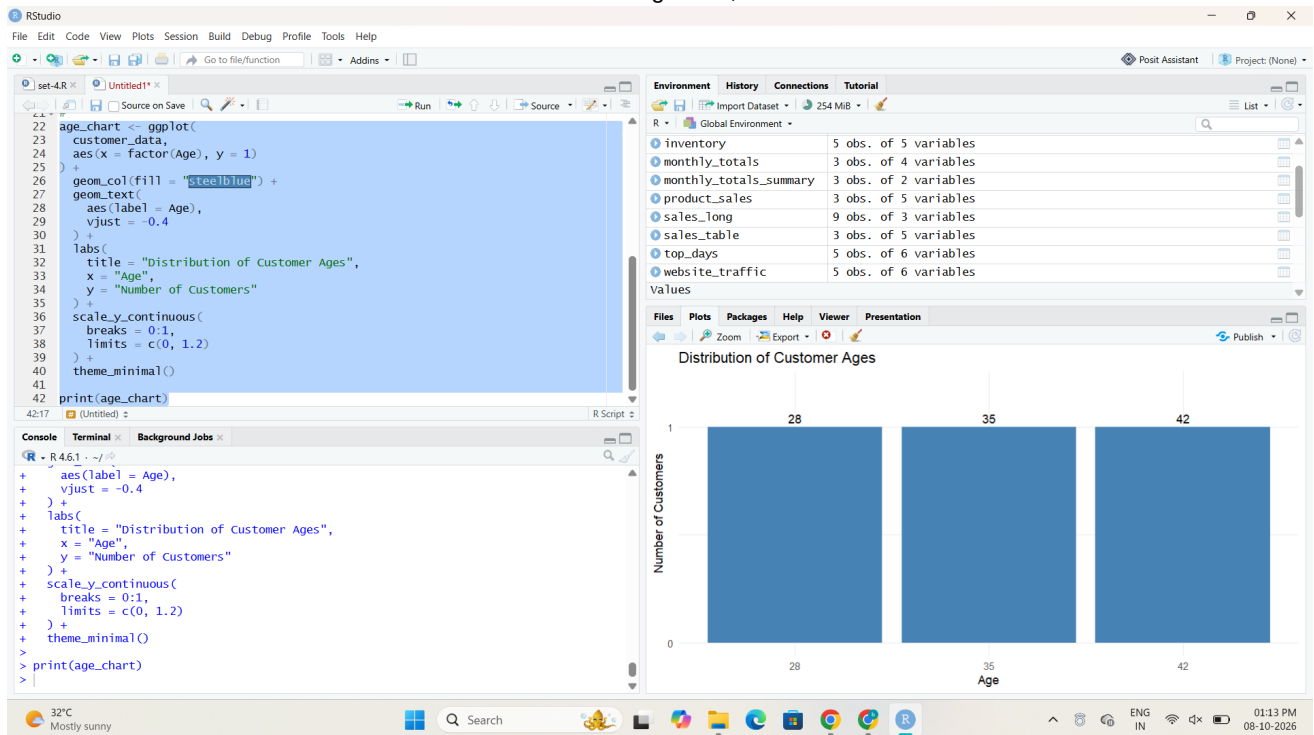

Customer ID	Age	Gender	Income (\$)
1	28	Female	50,000
2	35	Male	60,000
3	42	Female	75,000

Objectives

- Create a bar chart to visualize the distribution of customer ages.
- Generate a pie chart showing customer distribution by gender.
- Build and display a demographic information table.
- Develop a Tableau-style dashboard combining the charts and table.

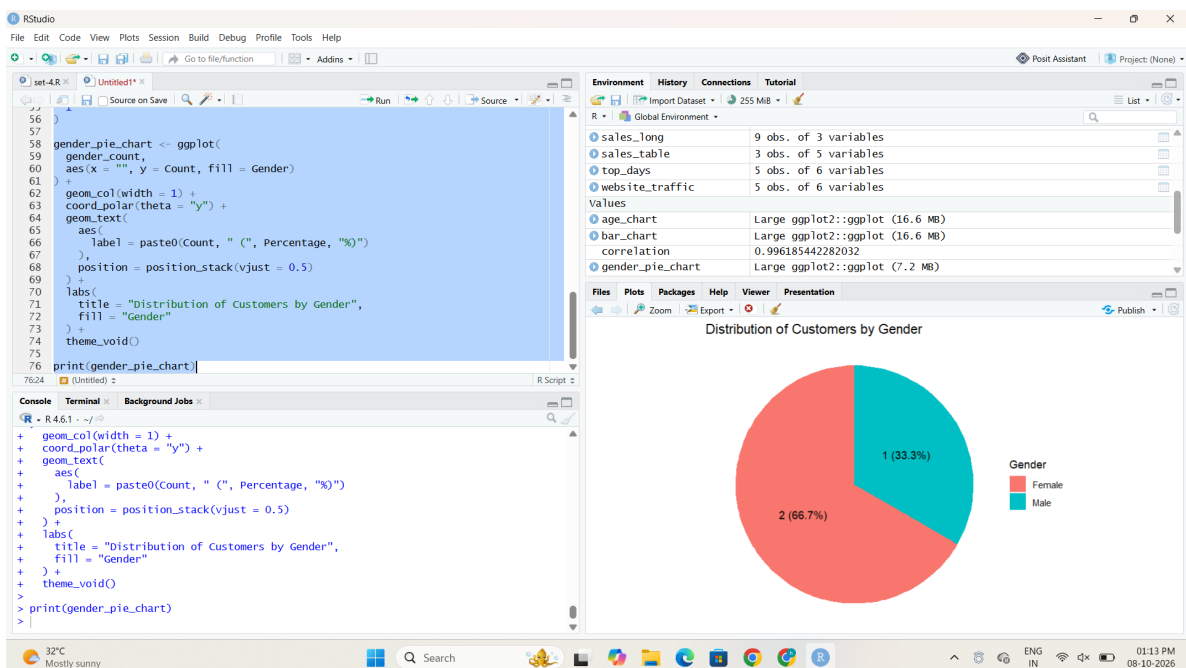

PROGRAM 1 – BAR CHART: CUSTOMER AGE DISTRIBUTION

The chart shows the distribution of the three recorded customer ages: 28, 35 and 42.

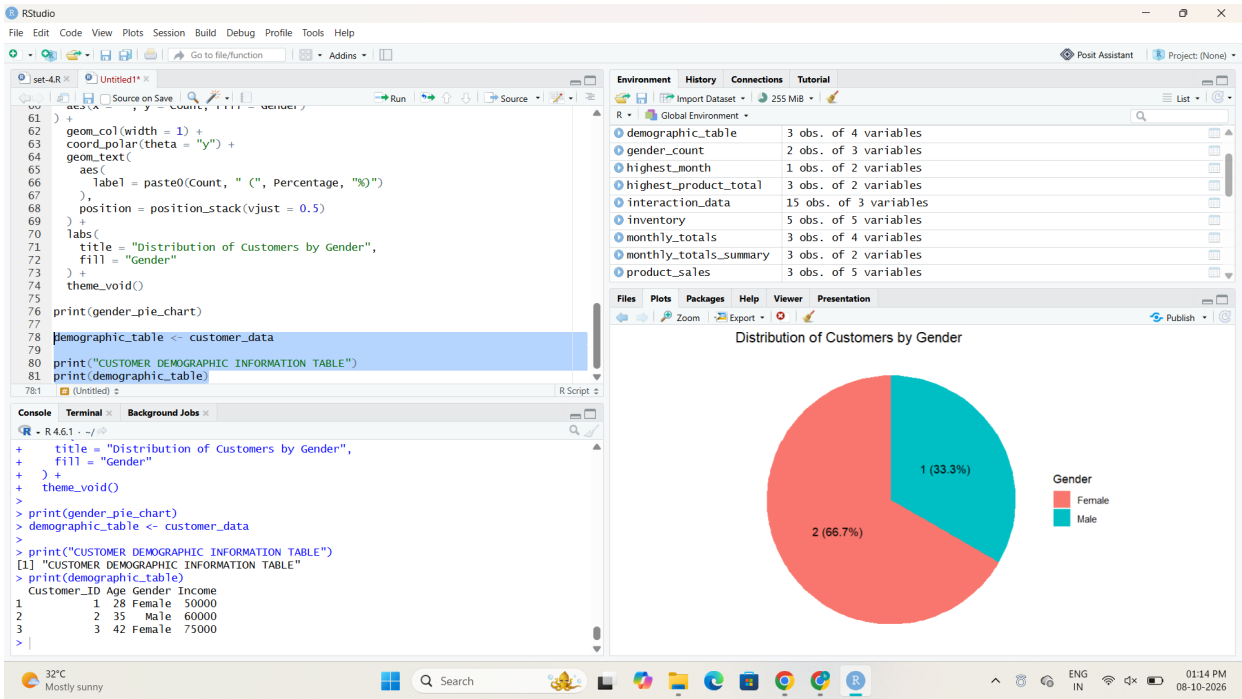

Result: Each recorded age has one customer.

PROGRAM 2 – PIE CHART: GENDER DISTRIBUTION

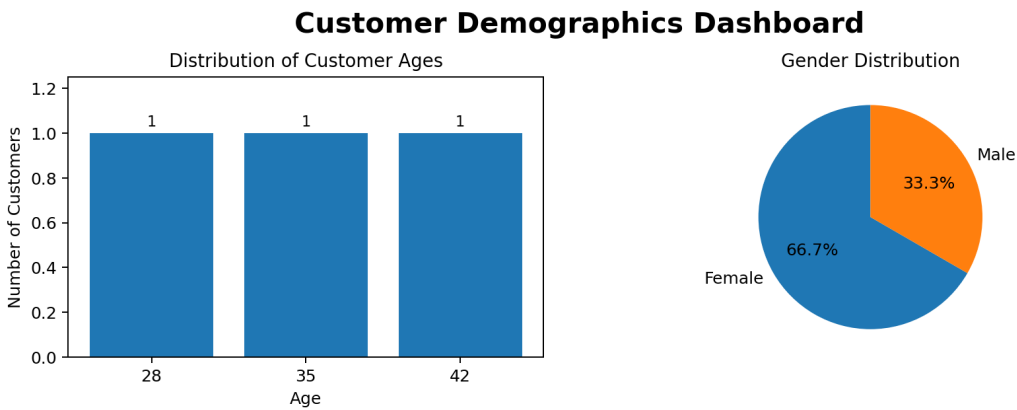

Result: Female customers = 2 (66.7%); Male customers = 1 (33.3%).

PROGRAM 3 – DEMOGRAPHIC INFORMATION TABLE

The table displays Customer ID, Age, Gender and Income for all three records.

PROGRAM 4 – TABLEAU DASHBOARD

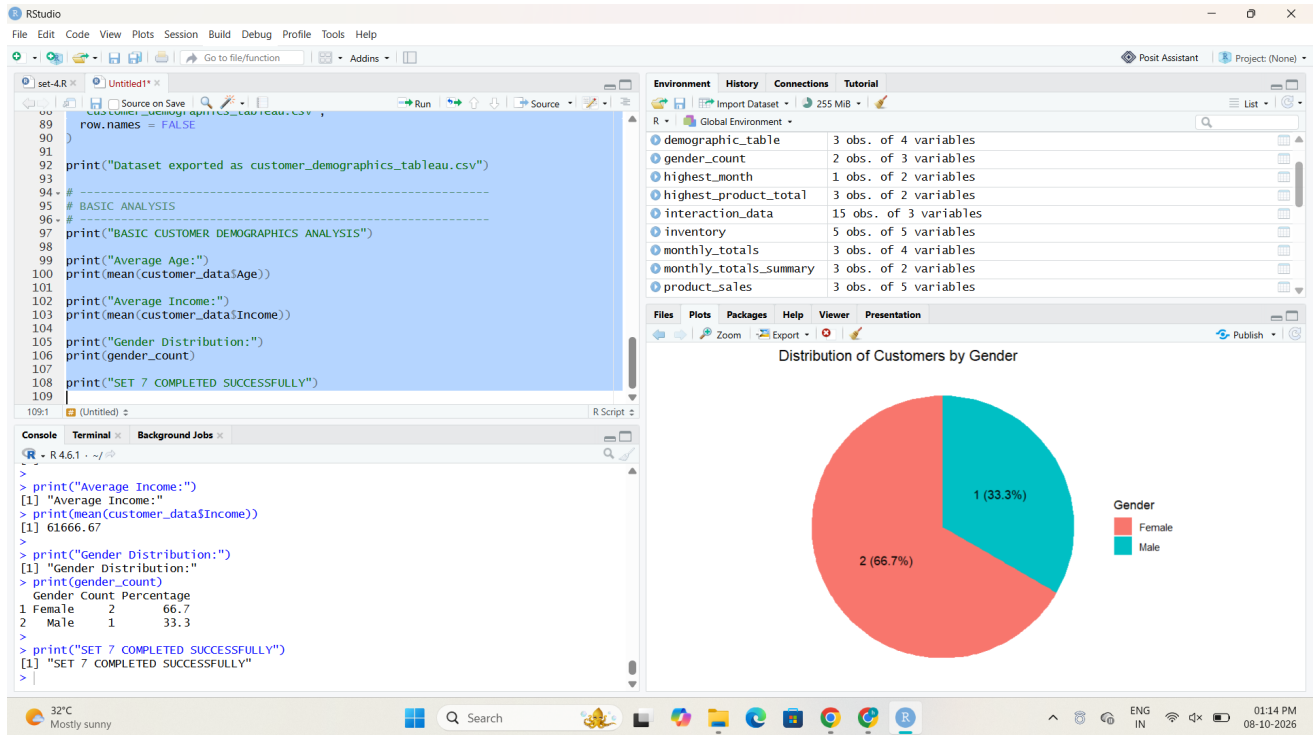

Customer ID	Age	Gender	Income (\$)
1	28	Female	50,000
2	35	Male	60,000
3	42	Female	75,000

Illustrative Tableau-style dashboard based on the supplied dataset

Illustrative Tableau-style dashboard combining the required bar chart, pie chart and demographic table.

RESULT AND ANALYSIS

Key Results

- Average customer age = 35 years.
- Average customer income = \$61,666.67.
- Female customers = 66.7%; Male customers = 33.3%.
- Total customer records = 3.

Conclusion

Customer demographic information was successfully represented using a bar chart, pie chart, demographic table and a combined dashboard for easy comparison and interpretation.
