

SET 12 – WEBSITE TRAFFIC ANALYSIS

DSA0601 – DATA HANDLING AND VISUALIZATION

Student Name	N. Harshith
Register Number	192325078
Department	Artificial Intelligence and Machine Learning (AIML)
Course	Data Handling and Visualization
Set	12

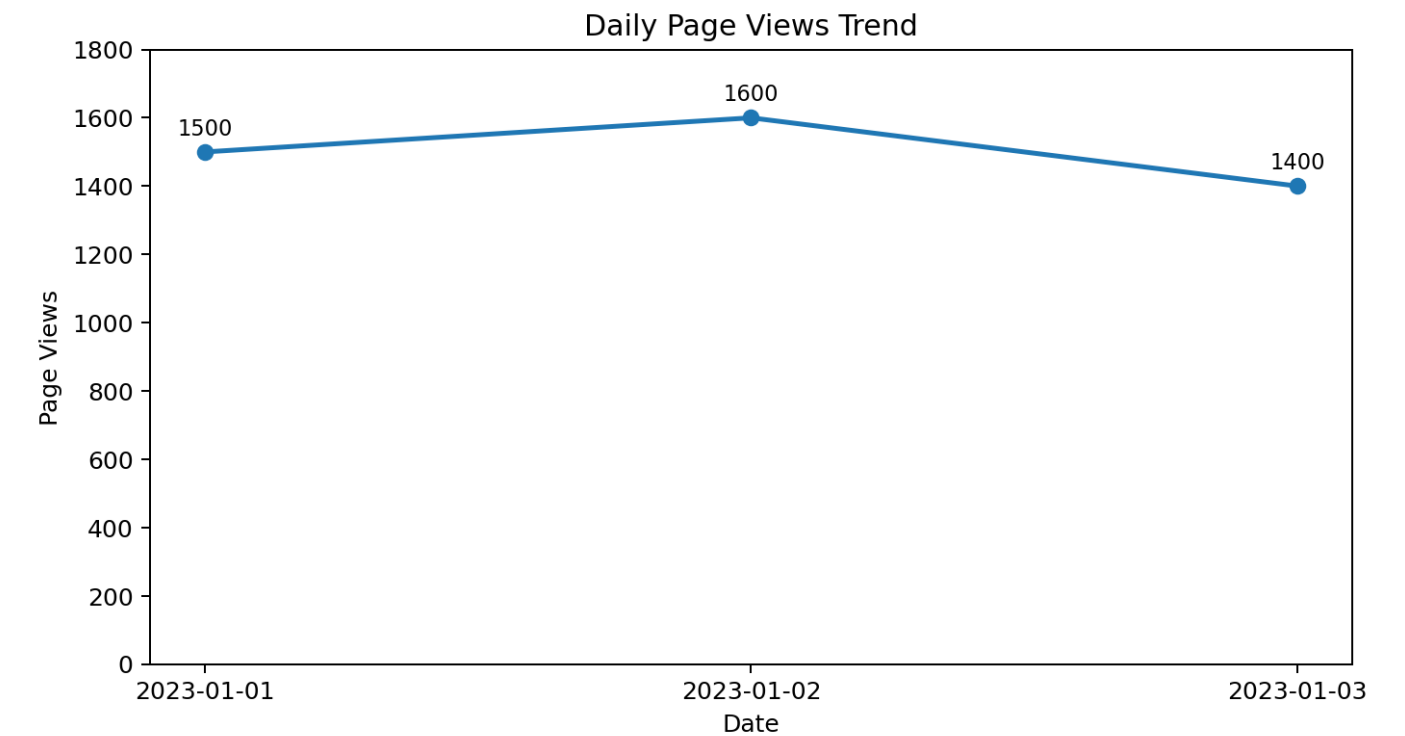

Dataset: Website Traffic

Date	Page Views	Click-through Rate
2023-01-01	1,500	2.3%
2023-01-02	1,600	2.7%
2023-01-03	1,400	2.0%

Objectives

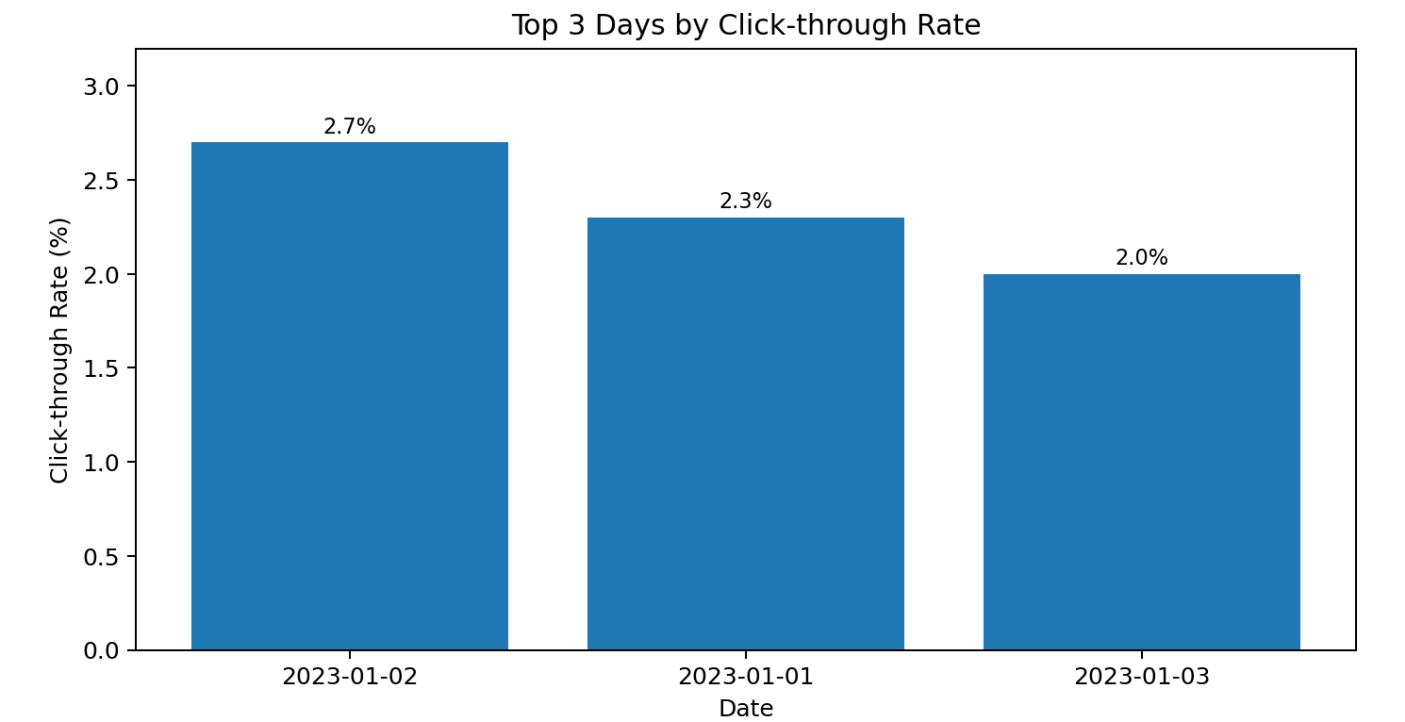

- Create a line chart showing the trend in daily page views over time.
- Generate a bar chart showing the top N days with the highest click-through rates.
- Build a table displaying the website traffic data for each day.
- Develop a Tableau-style dashboard combining the line chart, bar chart and table.

PROGRAM 1 – DAILY PAGE VIEWS LINE CHART

Result: Page views increase from 1,500 on January 1 to 1,600 on January 2, then decrease to 1,400 on January 3.

PROGRAM 2 – TOP N DAYS BY CLICK-THROUGH RATE

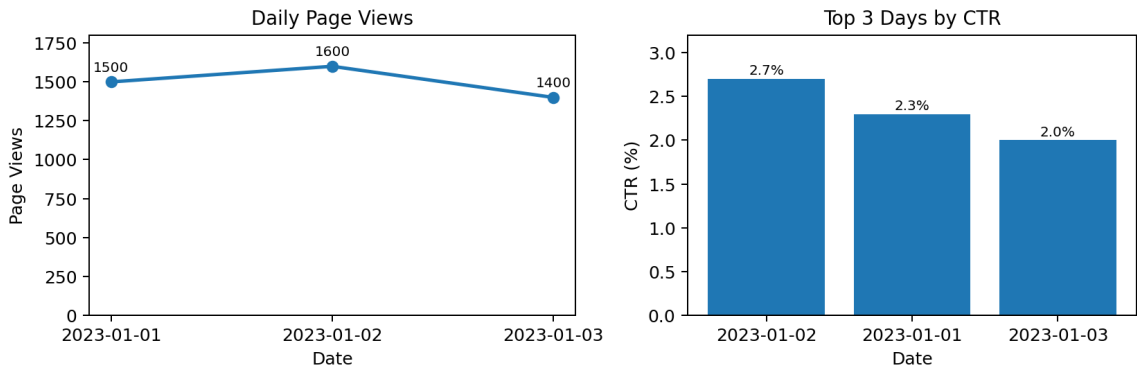

N was not specified in the question. Because the dataset contains only three days, the chart uses Top 3 and includes all available days. The highest CTR is 2.7% on January 2.

PROGRAM 3 – WEBSITE TRAFFIC DATA TABLE

Date	Page Views	Click-through Rate
2023-01-01	1,500	2.3%
2023-01-02	1,600	2.7%
2023-01-03	1,400	2.0%

PROGRAM 4 – TABLEAU DASHBOARD

Website Traffic Dashboard

Date	Page Views	Click-through Rate
2023-01-01	1,500	2.3%
2023-01-02	1,600	2.7%
2023-01-03	1,400	2.0%

Illustrative Tableau-style dashboard based on the supplied dataset

Illustrative Tableau-style dashboard combining the required line chart, bar chart and table for website traffic exploration.

RESULT AND ANALYSIS

- Total page views across the three days = 4,500.
- Highest page views = 1,600 on 2023-01-02.
- Lowest page views = 1,400 on 2023-01-03.
- Highest click-through rate = 2.7% on 2023-01-02.
- Click-through rates were 2.3%, 2.7% and 2.0% for January 1, 2 and 3 respectively.

Conclusion

The Website Traffic dataset was successfully analyzed using a daily page-view line chart, a top-N click-through-rate bar chart and a tabular representation. The combined dashboard provides a compact view of traffic volume and click-through performance.
