Name: _____ Roll No: _____

For each chart below, answer: What is it trying to tell you? Do you trust it? Why or why not?

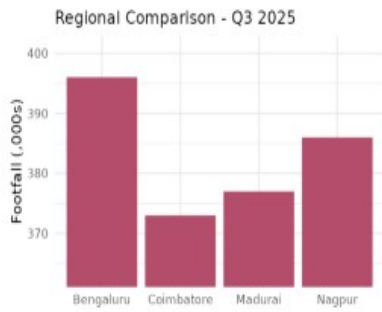

Chart 1

Expense Breakdown by Category (14 categories)

Chart 2

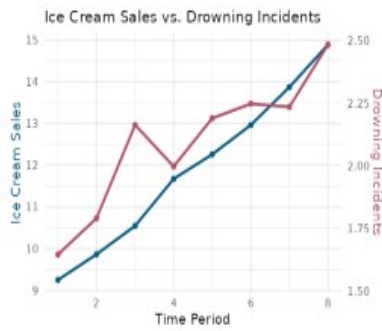

Chart 3

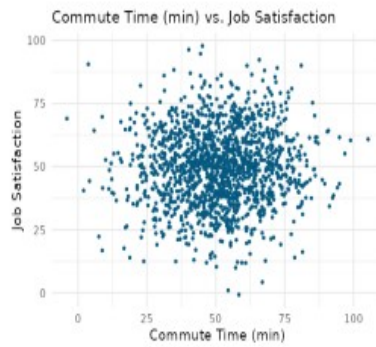

Chart 4

Your notes:

1/10/2026

Session 1 - Activity.

Decode the Chart

Name: N. Harshith

Roll NO: 24

chart 1 : Regional Comparison - Q3 2025

- Bengaluru has the highest value, followed by Nagpur, Madurai and Coimbatore.
- The difference between regions are relatively small.
- Do I trust it?

Not completely. The y-axis starts around 3,70,000 instead of 0, which makes differences b/w the bars.

- Main Issue: Misleading axis.

chart 2 : Expense Breakdown by Category.

- The chart shows how total expenses are divided among 14 categories.
- Some categories occupy larger portions, while some categories occupy smaller portions.
- Partially as the categories are in huge number and also, they are not named.
- Main issue: - Huge number of categories.

chart 3:- Ice cream sales vs Drowning incidents.

- Both Ice cream sales & Drowning incidents are shown and they are increasing over the time.
- Ice cream sales got huge peak between 2 & 3 time period and 7 & 8 time period.

Do i trust it?

- No, because there will be a peak season for ice creams might be like summer but the sales are not increased.

- Main issue:- Icecream sales relation is not correct

chart 4:-

- Points are plotted on the scatter plot
- More points are middled. that is average.

Do i trust it?

- No, Points are more and clumpy.

- Main issue: No detailed information can be taken from chart since it is clumpy.
